SUMMARY

AI & Data Science graduate with strong skills in Python, machine learning, and NLP. Hands-on experience in building data-driven solutions using clustering and sentiment analysis to generate actionable insights.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning • Malla Reddy Institute Of Engineering & Technology. Nov 2022 – May 2026 • Hyderabad, Telangana
CGPA: 7.3/10 • Coursework: OS, Computer Networks, Probability & Statistics, ML, DL, DBMS

SKILLS

Programming & Data

Python, SQL, Pandas, NumPy

ML & Modeling

scikit-learn, TensorFlow, PyTorch, XGBoost

Visualization

Matplotlib, Seaborn

Data Ops

Git, Linux, Jupyter Notebook.

Topics

EDA, Feature Engineering, Time Series, Model Evaluation

PROJECTS

Customer Segmentation Project • Python, Pandas, K-Means.

- Performed feature engineering and data preprocessing on structured datasets
- Performed customer segmentation using K-Means clustering on RFM features to identify high-value, loyal, and at-risk customer groups.
- Optimized cluster selection using the Elbow Method and Silhouette Score, and visualized clusters using PCA to generate actionable insights.

Mobile Reviews Sentiment Analysis Project • Python, Scikit-learn, NLTK, TF-IDF.

- Developed a **sentiment analysis model** using NLP techniques (tokenization, stopword removal, lemmatization, TF-IDF) to classify text into positive, negative, and neutral sentiments.
- Trained and evaluated models like Logistic Regression, SVM, achieving strong performance using accuracy, precision, recall, and F1-score metrics.

INTERNSHIPS / EXPERIENCE

AI Intern • Academor

Apr 2023 – June 2023 • Remote

- Developed and tested machine learning models to enhance AI project performance
- Performed data pre processing and analysis using Python to support model development.

CERTIFICATIONS

- Enterprise Data Science(2024)
- Excel Basics For Data Analytics(2025)
- Data Science Programme EXCELR(2026)
